

## Webinar on “Digital Threats & Mitigation”

**25<sup>th</sup> October 2024 - 1145 Hrs to 1300 Hrs**

In today's interconnected world, digital threats like cyberattacks, malwares, phishing, social engineering, etc. have become an increasingly pervasive and serious concern leading to reputational damage, operational disruption and financial loss for organizations as well as individuals. As our reliance on technology grows, so too does the potential for malicious actors to exploit vulnerabilities and cause significant harm. Understanding the significance of digital threats and implementing effective mitigation strategies is crucial to protecting individuals, businesses, and critical infrastructure.
